Yes, let's include an RS.

Thanks!

Ok, do you also want a Removal Assessment added using those same dates? Wasn't sure since RS was checked off as well.

Lois and Sonia, I changed the 2nd and 3rd polreps to Removal Actions , PRP Cleanup without and enforcement instrument. The start date should be 6/8/15 and the completion date (for EPA) of 9/1/15.

For contaminants you can just list the nitrites/nitrates. The wastewater contained these and total organic carbon, but it's all the same water (1 million gallons).

Sonia -

Two items that require follow-up for Miller Chemical –

1. The Final Polrep denotes “Emergency Response, Removal Assessment” within the Incident Category paragraph. The OSC checked off Removal Assessment but did not include the start/finish dates. Did the OSC intend to use the same Start/Finish dates and add the Removal Assessment (RS) as he did for the PJ?

2. One of the contaminants ("Total Organic Carbon") listed on the Data Entry Checklist is not an available option in SEMS. See below all the results found when "CARBON" is entered. Can you check with the OSC to determine the contaminant(s) that would be appropriate for entry from the list below?

Thanks,

L.
